He has been a great TA with a deep understanding of the topic. I really liked him because he wanted us to learn. If I had to say something, he corrected our assignments in a generous way and maybe to study later is better to be more strict.

High quality responses to problem sets, you clearly understand the problems we have and focus on them well. Always available outside of class for questions and clearly want us to understand the topics well. Thanks

For the majority of the class, he has been the best teacher assistant. He explains the concepts clearly.

23/12/2019 10:16 [Agregar etiquetas](#) – [Ver las respuestas del encuestado](#)

It is easy learn from his lessons. He is very clear and he cares in teaching you the meanings that there are behind the formulas.

22/12/2019 15:56 [Agregar etiquetas](#) – [Ver las respuestas del encuestado](#)

Good TA. He provides a lot of intuition to the course. Maybe I missed more rigorous answers to some of the questions.
